

PROJECT PROFILE

Boys & Girls Club of Nashua

PROJECT

Boys & Girls Club of Nashua
57 Grand Street
Nashua, NH

ARCHITECT

Team Design Harriman
One Perimeter Road
Manchester, NH

DETAILS

K-13 Beige
10,500 Square Feet
1.5" Thickness

The tables are set for the first time in a long time. Unable to use this multipurpose space due to the 4 second reverberation time, K-13 Beige has been applied to the fluted metal deck for acoustical control. The availability of 5 standard manufacturer's colors allowed the owner to select a color that would conceal ball hits and extend overall aesthetics for the foreseeable future. Applied at 1.5", the K-13 absorbs 100% of the sound that comes in contact with it. For more information regarding K-13 call 508-678-1118 or visit our web site @ www.atiincorporated.com.
